LIST OF CONTENTS

Number 1/2

R. M. Haralick and J. S. J. Lee	1	Context dependent edge detection and evaluation
Min-Hong Han and Dongsig Jang	21	The use of maximum curvature points for the recognition of partially occluded objects
H. D. Cheng, C. Tong and Y. J. Lu	35	VLSI curve detector
Hong-Chih Liu and M. D. Srinath	51	Corner detection from chain-code
M. K. Leung and Yee-Hong Yang	69	Dynamic two-strip algorithm in curve fitting
Hsi-Jian Lee and Wen-Ling Lei	81	Region matching and depth finding for 3D objects in stereo aerial photographs
Liang He and Zhenming Chai	95	A new method of automatic SCE detection
D. Brzakovic, H. Beck and N. Sufi	99	An approach to defect detection in materials characterized by complex textures
Keping Chen	109	Efficient parallel algorithms for the computation of two-dimensional image moments
W. Pedrycz	121	Fuzzy sets in pattern recognition: methodology and methods
Jun S. Huang and Wen R. Shieh	147	A heuristic method for separating clusters from noisy background
Liisa Räihä	159	Approximate sequence comparison: a study with histograms
A. J. Broder	171	Strategies for efficient incremental nearest neighbor search
S. Mazzola	179	A *K*-nearest neighbor-based method for the restoration of damaged images
C. S. Carman and M. B. Merickel	185	Supervising ISODATA with an information theoretic stopping rule
R. Lenz	199	Group invariant pattern recognition
Announcements	219	
Call for Papers	221	
Software Survey Section	i	

Number 3/4

Xiao-Wei Tu and B. Dubuisson	223	3-D information derivation from a pair of binocular images
S. E. Englert, Zhaoxin Sheng and R. L. Kirlin	237	The evaluation of a crosscorrelation pattern recognition technique for flow visualization
P. M. Griffin and B. L. Deuermeyer	245	A methodology for pattern matching of complex objects
Chyuan Jy Wu and Jun S. Huang	255	Human face profile recognition by computer
Wen-Nung Lie and Yung-Chang Chen	261	Robust line-drawing extraction for polyhedra using weighted polarized Hough transform
Chia-Chun Hsu and Jun S. Huang	275	Partitioned Hough transform for ellipsoid detection
D. S. McKenzie and S. R. Protheroe	283	Curve description using the inverse Hough transform
J. M. H. du Buf, M. Kardan and M. Spann	291	Texture feature performance for image segmentation
R. P. Johnson	311	Contrast based edge detection
F. Ghorbel and J. L. de Bougrenet de la Tocnaye	319	Automatic control of lamellibranch larva growth using contour invariant feature extraction
A. Pal (Pathak) and S. K. Pal	325	Generalized Guard-zone Algorithm (GGA) for learning: automatic selection of threshold
D. G. Elliman and I. T. Lancaster	337	A review of segmentation and contextual analysis techniques for text recognition
A. C. Downton and C. G. Leedham	347	Preprocessing and presorting of envelope images for automatic sorting using OCR
H. Takahashi, N. Itoh, T. Amano and A. Yamashita	363	A spelling correction method and its application to an OCR system
F. Barlach	379	Payphone coin validation using pattern recognition
Shiaw-Dong D. Liu and D. P. Casasent	385	Iterative Fisher/minimum-variance optical classifier
Ke Juan Peng, Tsuyoshi Yamamoto and Yoshinao Aoki	393	A new parsing scheme for plex grammars
P. Martin	403	Letter to the Editor
M. Flasinski	405	Reply to Philippe Martin
Erratum	407	
Announcements	409	
Software Survey Section	i	

Number 5

R. N. Strickland, T. Draelos and Zuhua Mao	411	Edge detection in machine vision using a simple L_1 norm template matching algorithm
A. Kundu	423	Robust edge detection
Song-Tyang Liu and Wen-Hsiang Tsai	441	Moment-preserving corner detection
Chun-Hsien Chou and Yung-Chang Chen	461	Moment-preserving pattern matching
Chia-Wei Liao and Jun S. Huang	475	Stroke segmentation by Bernstein–Bezier curve fitting
S. S. El-Dabi, R. Ramsis and A. Kamel	485	Arabic character recognition system: a statistical approach for recognizing cursive typewritten text
R. M. K. Sinha	497	On partitioning a dictionary for visual text recognition
C. J. Wells, L. J. Evett, P. E. Whitby and R. J. Whitrow	501	Fast dictionary look-up for contextual word recognition
E. J. Yannakoudakis, I. Tsomokos and P. J. Hutton	509	*n*-Grams and their implication to natural language understanding
T. Krishnan and S. C. Nandy	529	Efficiency of discriminant analysis when initial samples are classified stochastically
N. J. C. Strachan and P. Nesvadba	539	Fish species recognition by shape analysis of images
Announcement	545	
Software Survey Section	i	

Number 6

A. Bryant and J. Bryant	547	Following boundaries of discrete binary objects in space
E. Salari and Chiou-Muh Jong	553	A method to calculate the structure and motion parameters from line correspondences
L. Gupta, M. R. Sayeh and R. Tammana	563	A neural network approach to robust shape classification
Chen-Chau Chu, N. Nandhakumar and J. K. Aggarwal	569	Image segmentation using laser radar data
H. Asar, N. Nandhakumar and J. K. Aggarwal	583	Pyramid-based image segmentation using multisensory data
L. Goldfarb	595	On the foundations of intelligent processes—I. an evolving model for pattern learning

S. Chaudhury, A. Acharyya, S. Subramanian and G. Parthasarathy 617 Recognition of occluded objects with heuristic search

Zen Chen, Shaw-Yin Lin and Yi-Yao Chen 637 A parallel architecture for probabilistic relaxation operations on images

J. Shou-Pyng Shu and H. Freeman 647 Cloud shadow removal from aerial photographs

Kou-Yuan Huang 657 Branch and bound search for automatic linking process of seismic horizons

Chaur-Chin Chen, R. C. Dubes and A. K. Jain 669 Letter to the Editor

Software Survey Section i

Number 7

V. K. Govindan and A. P. Shivaprasad 671 Character recognition—a review

Ming Zhao 685 Two-dimensional extended attribute grammar method for the recognition of hand-printed Chinese characters

M. Ammar, Y. Yoshida and T. Fukumura 697 Structural description and classification of signature images

E. R. Hancock and J. Kittler 711 Discrete relaxation

S. Kundu and R. Sridhar 735 An $O(kN.\log N)$ algorithm for decomposing a set of polygons into D-separable components

Chea-Tin (Tim) Tseng and B. M. E. Moret 745 A new method for one-dimensional linear feature transformations

B. A. Zyrianov 753 Method of feature extraction using potential functions

S. Shlien 757 Multiple binary decision tree classifiers

M. Flasiński 765 Distorted pattern analysis with the help of node label controlled graph languages

F. J. Wyman, D. M. Young and D. W. Turner 775 A comparison of asymptotic error rate expansions for the sample linear discriminant function

Hsi-Jian Lee, Lung-Fa Huang and Zen Chen 785 Multi-frame ship detection and tracking in an infrared image sequence

Wen-Shou Chou, Chung-Ming Wu, Yung-Chang Chen and Kai-Sheng Hsieh 799 Detecting myocardial boundaries of left ventricle from a single frame 2DE image

Software Survey Section I

Number 8

N. N. Abdelmalek 807 Algebraic error analysis for surface curvatures and segmentation of 3-D range images

D. H. Kite and M. Magee 819 Determining the 3D position and orientation of a robot camera using 2D monocular vision

Chun-Shin Lin and Chamnong Jungthirapanich 833 Invariants of three-dimensional contours

P. Srinivasan, Ping Liang and S. Hackwood 843 Computational geometric methods in volumetric intersection for 3D reconstruction

Shu-Yuan Chen and Wen-Hsiang Tsai 859 A systematic approach to analytic determination of camera parameters by line features

D. Yu-Shan Fong and Jwo-Liang Chu 879 A string pattern recognition approach to polygon clipping

A. K. Hrechak and J. A. McHugh 893 Automated fingerprint recognition using structural matching

Li Wang and Dong-Chen He 905 Texture classification using texture spectrum

A. Di Nola, W. Pedrycz, S. Sessa and E. Sanchez 911 Designing of classification procedures with the use of equality and difference operators

S. Suzuki and T. Yamada 919 MARIS: map recognition input system

Software Survey Section I

Number 9

Young Won Lim and Sang Uk Lee 935 On the color image segmentation algorithm based on the thresholding and the fuzzy c-means techniques

T. R. Reed, H. Wechsler and M. Werman 953 Texture segmentation using a diffusion region growing technique

A. Khotanzad and A. Bouarfa 961 Image segmentation by a parallel, non-parametric histogram based clustering algorithm

A. Srivastava and M. N. Murty 975 A comparison between conceptual clustering and conventional clustering

Wen-Nung Lie, Ching-Wen Yu and Yung-Chang Chen 983 Model-based recognition and positioning of polyhedra using intensity-guided range sensing and interpretation in 3-D space

J. Mukherjee, P. P. Das and B. N. Chatterji 999 An algorithm for the extraction of the wire frame structure of a three-dimensional object

Fan Jiang and T. E. Weymouth 1011 Depth from relative normal flows

H. Yamada, K. Yamamoto and T. Saito 1023 A nonlinear normalization method for handprinted Kanji character recognition—line density equalization

F. Nouboud and R. Plamondon 1031 On-line recognition of handprinted characters: survey and beta tests

Announcement 1045

Software Survey Section I

Number 10

R. A. Brooks and A. C. Bovik 1047 Robust techniques for edge detection in multiplicative Weibull image noise

A. Asano, K. Itoh and Y. Ichioka 1059 The nearest neighbor median filter: some deterministic properties and implementations

Shiaw-Shian Yu and Wen-Hsiang Tsai 1067 A new thinning algorithm for gray-scale images by the relaxation technique

Suh-Yin Lee and Fang-Jung Hsu 1077 2D C-string: a new spatial knowledge representation for image database systems

A. Khotanzad and Yaw Hua Hong 1089 Rotation invariant image recognition using features selected via a systematic method

L. Gupta and K. Malakapalli 1103 Robust partial shape classification using invariant breakpoints and dynamic alignment

H. D. Cheng, Y. Y. Tang and C. Y. Suen 1113 Parallel image transformation and its VLSI implementation

Li-Min Fu 1131 Analysis of the dimensionality of neural networks for pattern recognition

Software Survey Section I

Number 11

T. Akiyama and N. Hagita 1141 Automated entry system for printed documents

T. Taxt, J. B. Ólafsdóttir and M. Dæhlen 1155 Recognition of handwritten symbols

Chia-Wei Liao and Jun S. Huang 1167 A transformation invariant matching algorithm for handwritten Chinese character recognition

Ling-Hwei Chen and June-Rong Lieh 1189 Handwritten character recognition using a 2-layer random graph model by relaxation matching

F. El-Khaly and M. A. Sid-Ahmed 1207 Machine recognition of optically captured machine printed Arabic text

T. Shipley and H. Shore 1215 The human texture visual field: fovea-to-periphery pattern recognition

R. Mehrotra, S. Nichani and N. Ranganathan 1223 Corner detection

J. E. Golston, R. H. Moss and W. V. Stoecker 1235 Boundary detection in skin tumor images: an overall approach and a radial search algorithm

Z. C. Li 1249 Discrete techniques for computer transformations of digital images and patterns

T. Krishnan and S. C. Nandy 1275 Efficiency of logistic-normal stochastic supervision

Qiuming Zhu 1281 On the minimum probability of error of classification with incomplete patterns

J. P. Myles and D. J. Hand 1291 The multi-class metric problem in nearest neighbour discrimination rules

B. Shekar, M. Narasimha Murty and G. Krishna 1299 A knowledge-based approach to pattern generation

S. Z. Selim 1307 Comments on: optimality test for fixed points by Kim *et al.*

T. Kim, J. Bezdek and R. Hathaway 1309 Reply to "Comments on: optimality test for fixed points by Kim *et al.*"

Software Survey Section I

Number 12

K. T. Lua and K. W. Gan 1311 Recognizing Chinese characters through interactive activation and competition

T. S. El-Sheikh and S. G. El-Taweel 1323 Real-time Arabic handwritten character recognition

N. Insari and E. J. Delp 1333 On the distribution of a deforming triangle

M. Lindenbaum and A. Bruckstein 1343 Reconstructing a convex polygon from binary perspective projections

W. Long and Yee-Hong Yang 1351 Stationary background generation: an alternative to the difference of two images

K. Ozawa 1361 Simulation studies on optical illusions based on a position-dependent point spread function

T. E. Flick, L. K. Jones, R. G. Priest and C. Herman 1367 Pattern classification using projection pursuit

S. L. Tanimoto and E. W. Kent 1377 Architectures and algorithms for iconic-to-symbolic transformations

Shu-Yuen Hwang 1389 Two heuristics for arranging the order of feature-extraction operations in recursive Bayesian decision rule

Y. Park and J. Sklansky 1393 Automated design of linear tree classifiers

R. Wilson and M. Spann 1413 A new approach to clustering

E. A. Patrick 1427 The Outcome Advisor®
